

## **Programmes & fields of study at Penn**

A Thouron Award may be held in most fields of study available, however, please note that only **full-time** postgraduate programmes, which are **wholly located** at the University of Pennsylvania and lead towards a **degree or equivalent qualification** are eligible.

Many schools and departments require or strongly recommend that applicants submit scores from standardised tests such as the Graduate Record Examination (GRE) and the General Management Admissions Test (GMAT). Where applicable, candidates will be asked to confirm whether they have complied with this requirement prior to attending a Thouron interview.

Please see below for details of eligible programmes - further details and contacts can be found via <http://www.upenn.edu/programs/graduate.php>
